The Options' Catalogue

***The essential tool to make your Savaria
Concord Lifts fit your environment...***

Our Catalog's Benefits

Introduction to the company

Savaria Concord Lifts Inc. is proud to introduce you to its wide range of products that has offered accessibility to many people for more than 25 years. Being now the second largest accessibility company in North America, our priority remains our customers.

A new tool for you, our Catalog

This catalog is dedicated to our dealers. This will become an essential support tool for you to introduce our products and their options to your customers.

Thanks to a selection of pictures and color panels, this catalog will show your customer how our elevators will fit their environment. The objective of this catalog is to show the aesthetic aspects of our lifts and stair lifts and to illustrate the various options available for our products. We will also let you refer to our brochures and specifications to know more about the technical features.

We hope that this catalog would become a tool that will avoid any surprise to your customer once their installation has been achieved.

We thank you for your trust.

B.07 Straight Stairway Chairlift

Residential & Commercial Access

The **B.07** Stair Lift can meet a wide variety of accessibility needs. Straight stairways won't be an obstacle for you any longer, wherever you are, indoor or outdoor.

Commercial Package

- We offer a commercial use option that is in accordance with **ASME 18.1** (USA) and **CSA-B355** (Canada).

Outdoor Package

- If you install your **B.07** outside, we offer the **Outdoor Package** which protects your chairlift from the weather changes. The **Outdoor Package** includes a **vinyl upholstery**, a **cover for travelling cable**, a **vinyl stair lift cover** and **keyed controls**.

Custom color of rail

- If you want a **custom color of rail**, choose the color that will best fit your environment on our color chart (see page 4).

For Further Information, please call: 1-800-931-5655

Step-Saver straight stairway chairlift

Residential access

An easy installation for an easy use, the **Step-Saver** is the stair lift you need to make your stairway a friend rather than an obstacle.

Continuous Charging Station

- For your comfort of use, you can require the **continuous charging station** option that allows to charge batteries anywhere along the rail. The system used to charge the batteries along the rail is similar to a bus-line system.

Key Switch

- For your safety and the safety of others, a **key switch that disables the control** is offered as an option. The owner of the key will be the only one to be able to operate the stair lift. The key switch will be flush mounted in the wall on a stainless steel plate beside the operation rocker button. All 3 keys must be removed to disable the stair lift.

Key switch (seat control only)

- You can also have a **key switch** that will **disable only the seat control**.

For Further Information, please call: 1-800-931-5655

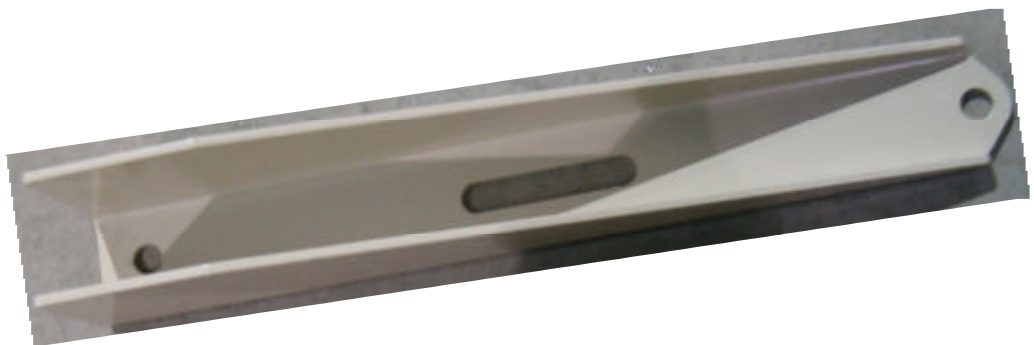

Flip-up rail at bottom landing

- Thanks to this option, your Step-Saver will never obstruct your way. The part exceeding at the bottom landing can be flipped-up in order to leave the way clear.

Mounting Bracket Extensions

- Also available on the B.07 model, the bracket extensions are made to reduce standard rail overrun at top landing (3 minimum are required per stair lift).

For Further Information, please call: 1-800-931-5655

“Stairfriend” Curved Stairway Chair Lift

Residential Access

The “**Stairfriend**” Chair lift is going to become your companion. It will make you go upstairs however your stairway is built.

Mid-landing Charging Station

- For a comfortable use, you can add a **mid-landing charging station**. This will make the use of your chairlift more convenient.

Additional Remote Transmitters

- For comfortable usage, you can have **additional remote transmitters**.

Residential Keyed Package

- For your safety and the safety of others, you can install the **Residential Keyed Package** on car. Only the owner of the key will be able to operate the stair lift.

Stair Lift
Controller on
the armrest.

For Further Information, please call: 1-800-931-5655

ES-125 Stair Platform Lift

Commercial • Residential • Indoor • Outdoor Applications

The **ES-125** is the reference Stair Platform Lift. It can be **residential** and also **commercial**. Designed to improve the access of **persons in wheelchairs**, this platform lift can be installed in churches, schools, museums... at a more affordable price than a traditional elevator and it also needs less construction.

The standard system (ES-125P) needs a machine room beneath the steps and its rated load is 450 lbs (204 kg)

Audio Visual Alarm Option (only commercial)

- We recommend you this option in the case of a commercial application where you would let the people use the lift alone. This will allow a **quick assistance** in case of problems (mandatory in some states and provinces).

Fire Service Option

- For **commercial applications**, we recommend you to take the **Fire Service Option**. The lift will be able to work in case of fire in order to evacuate easily the persons in need. It will work in the designated direction and for one time only. After the user has evacuated, the platform will automatically fold-up and disable itself.

For Further Information, please call: 1-800-931-5655

Safety Arms

- For your safety and the safety of other users, we offer optional **safety arms**. Safety arms are an additional safety device that will make your travel safer.

We offer two types of safety arms :

- ◆ The **3 position manual safety arms**

1. Folded-up
2. Horizontal
3. Folded-down for storage

- ◆ The **2 position motorized safety arms**.

1. Folded-up
2. Horizontal

Wire remote control

- For comfortable and easy usage, we offer the possibility to have **wire remote control** (both residential and commercial applications). Installed on the platform, this remote control will avoid you to make any unpleasant move to reach the control panel. It also secures the platform user should an attendant to walk up and down the stairs along with them.

Wireless remote control (residential only)

- This option will make your life even easier. By using the wireless remote control, you will reduce your travel time because you will be able to command your lift from anywhere* in your house.

*as long as there are no obstacles between the transmitter and the receiver. It is mandatory to always keep the platform in sight when using wireless remote control.

For Further Information, please call: 1-800-931-5655

Folding Seat with Safety Belt

- Thanks to this option, the **ES-125** can have several uses. It will be able to transport persons in wheelchair and also persons who have some difficulty to climb stairs. Through this option, the **ES-125** becomes an **accessibility solution for everyone**.
 - Simply unfold the seat, buckle-up and go for a ride.

Key Locked Platform

- This option is available on **manually folding platform**. This will ensure that you are the only one to use the platform.

Power Folding Platform

- Savaria Concord Lifts Inc. offers you the possibility to have a **power folding platform**. This option makes usage of platform even easier because you can fold and unfold it without **any effort** (with the use of a button). Thus, the platform will never obstruct your stairway.

ES-125 Plus

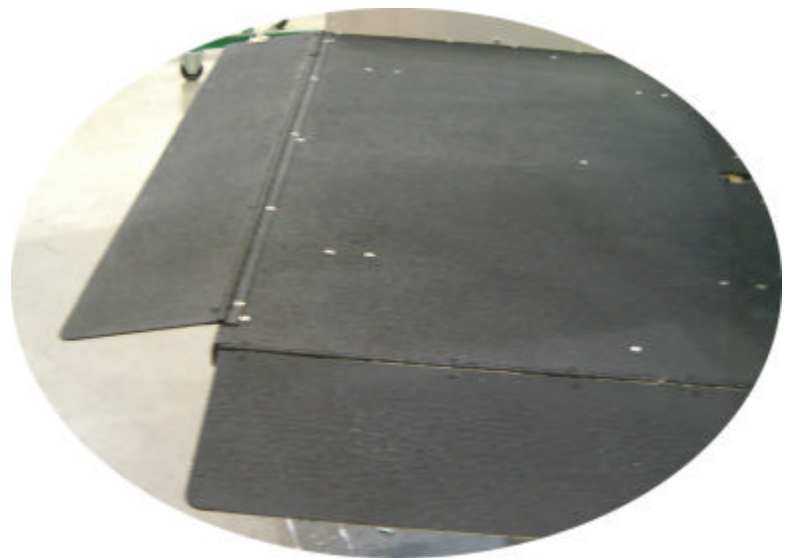

- The **ES-125 Plus** doesn't require any machine room since the electric motor, gear reducer and the controller are self-enclosed in the metal cabinet upstairs (see picture). This is a roller chain #50 and an aircraft cable drive system.

For Further Information, please call: 1-800-931-5655

90° Exit On Platform

- This option might be essential when the bottom/top landing of your stairway is not big enough to welcome the platform and to allow you to go off it. This **90° Exit** is an option that makes the **ES-125** more polyvalent since it will be able to adapt to most environment (consult factory for feasibility).

Outdoor Package Option

- If you have a stairway or an obstacle outside and the stairway prevents you from getting into your home, then we have a solution for you: you can have an **outdoor ES-125**, thanks to the option referred above. Your **ES-125** will be apt to resist outside from its special features. The **outdoor package** includes the **travelling cable system**, **water-resistant call/send post**, **silicone joint** and the metal parts are treated with **yellow zinc oxidize** to resist corrosion.

For Further Information, please call: 1-800-931-5655

The Multilift

ACME Screw Drive Vertical Platform Lift

Residential • Commercial in the USA • Indoor • Outdoor

The **Multilift** offers a safety and smooth travel thanks to its ACME Screw Drive System. This ruggedly constructed platform lift has proven to be perfect for indoor and outdoor applications.

Travel Size

There are **two (2)** travel sizes for the **Multilift**. It can be **48"** (1,219 mm) or **72" high** (1,829 mm) travel.

Public Package (available only in the USA)

- The **Multilift** can be used as a commercial vertical platform lift. We offer two **public packages**, one complies with the code **ASME A17.1** and the other complies with the **ASME A18.1**. Both packages will be delivered with **two call/send stations** so that the **Multilift** can be used easily from both landings.

Operation on 12 VDC Battery (Battery not included)

- Available on **residential applications** only, this option will allow you to use the **Multilift** as usual in case of power failure. You will be able to do up to ten (10) return trips under full load with a battery in good working condition.

Custom color

- If you want a **custom color** for your unit, you can choose the color that will best fit your environment on our color chart (see page 4).

For Further Information, please call: 1-800-931-5655

Top landing gate

For your safety and comfortable usage, the **top landing gate** (see picture on the left) is mandatory. This gate is 42" (1,067 mm) high and is made of aluminium with metal inserts. Its rough structure enables it to resist heavy weather conditions. This will be delivered with a G.A.L interlock and an adjustable damper. Thus, you will have one of the safest system, because the gate will not open unless the platform is at the top landing. An optional Plexiglas insert is available.

Platform Gate

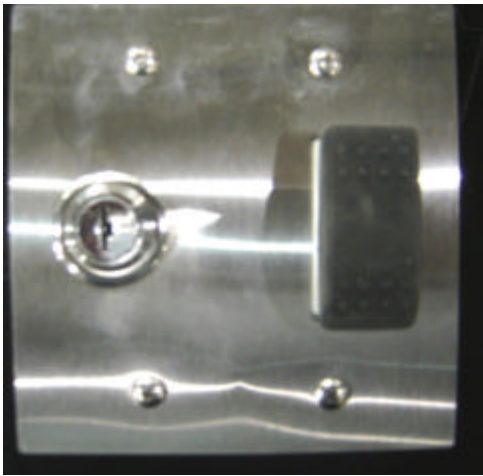

- We also offer an **optional platform gate**. This gate is 42" (1,067 mm) high and made of aluminium with metal insert. It is delivered with a lock (*Warning: this gate will reduce the platform width and length*). Can be mandatory in some cases.

Additional Stop

- If your **Multilift** is a **72" travel** (1,829 mm), you can add an intermediary stop. This option includes the additional **call station**, the **limit switches** and necessary **wiring**. This option will make your **Multilift** a very practical mean of transport.

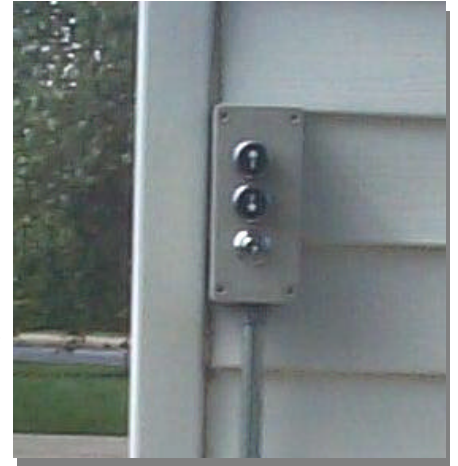

For Further Information, please call: 1-800-931-5655

Flush Mounted Call/Send Station

Call/Send Station With Key

- For more freedom of movement, we offer you the possibility to have call/send stations with key. The benefit is that you can move the platform without being on it. There are 3 ways to install your call/send station, it can be flush, surface or door frame mounted.

Surface Mounted Call/Send Station

Emergency Audible Alarm

This option, installed on car, is an additional safety device that will allow you to warn others in case of problem.

Grab Rail

- For comfortable usage and more convenience, we offer you the **Grab Rail**.

80" (2032 mm) Low profile Aluminium Door

- Flush mounted in an aluminium door frame, this aluminium door can come with either clear or Bronze Plexiglas inserts.

For Further Information, please call: 1-800-931-5655

The **V-1504** Vertical Platform Lift

Indoor & Outdoor • Residential & Commercial Access

The V-1504 is the most versatile lift available on the market. Thanks to the different models and to the several options available, the V-1504 will adapt perfectly to your home. Its features allow him to be also well integrated in commercial buildings such as schools, churches or office buildings... The V-1504 declines itself in 6 different models **Standard, PE, TL, Lux, Prestige, Mobile.**

The V-1504 miscellaneous options

(options available on STD, TL, PE and LUX except if specified)

Additional Stop

- The V-1504 comes standard with 2 stops but we offer you the possibility to have more stops. We will provide the controller, the call station and the limit switches & wiring.

Custom color

- If you want a **custom color** for your unit, you can choose the color that will best fit your environment on our color chart (see page 4).

For Further Information, please call: 1-800-931-5655

Folding Seat on Platform

- Thanks to this option, the **V-1504** can have several uses. It will be able to transport persons in wheelchair and also walking individuals who have some difficulty to use stairs. Through this option, the **V-1504** becomes an **accessibility solution for everyone**.

Telephone Jack Only

- Since it might be essential for you to have a phone on platform, we offer you the possibility to have a telephone jack so that you may install your own phone. You will be able to answer your phone calls and use it in case of an emergency, should that happened.

Telephone on Platform (Recessed in Side Guard Panel)

- To have a nicer finish, we also offer to install a telephone in the side guard panel. It will be recessed in the cab, stored out of the way in a plastic cavity.

Hands Free Phone (Intercom)

- This phone is the easiest phone to use that you will ever find on a platform lift. It can be activated with the help of a single button. Excellent for public applications, it can also be used on a residential set-up.

90° Side Exit

- This option is offered so that the platform lift can adapt to any construction and lay-out challenges.

Enter/Exit Same Side (Includes Third Guard Panel)

- If your platform lift has its enter and exit on the same side, you can have a platform with three side guard panels. This will be safer and the finish will be perfect.

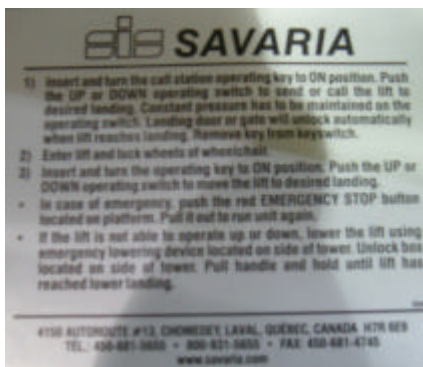

For Further Information, please call: 1-800-931-5655

Platform Safety Pan

- The Safety Pan is an additional safety device. Installed under the platform, it will stop the elevator whenever something obstructs the travel while going down. It is mandatory for an application without enclosure nor hoistway.

Operating Instruction Plate

- This is mandatory on a public platform lift so that anyone who would like to use the lift, will be able to read its instructions.

3" (76 mm) Diameter Buttons on Car

- Savaria Concord Lifts can provide you larger control buttons on platform. These buttons are proposed to render operation of the platform easy for everybody.

Auxiliary Illumination 12 VDC on Platform

- This option is offered to guarantee you that your cab is **always lit** and especially the control operating panel. Thanks to this option you will be able to see in your elevator even in case of power failure.

For Further Information, please call: 1-800-931-5655

80" Low profile Aluminium Landing Door (N/A on LUX)

- Flush mounted in an aluminium door frame, this aluminium door can come with either clear Plexiglas inserts or Bronze Plexiglas inserts. Provided standard on PE and TL for bottom landings, you can also have it on a V-1504 Standard and for your top or intermediate landings.

42" Top Landing Gate

- This gate is made of aluminium with a metal insert. We provide you a G.A.L interlock to keep the door closed and a damper to ease usage of the gate.

Clear Plexiglas or Bronze Plexiglas Panel (or polycarbonate)

Thanks to Savaria Concord Lifts' large choice of option, you can put special inserts in your gates or doors and also for your enclosure models. You can see on the pictures samples of bronze and clear Plexiglas.

Clear Plexiglas

1/4" (6 mm) Tempered Glass Inserts (Gate/Door pictures)

- Your gates and doors can comply with the environment where they are set thanks to this option that would be recommended in a hoistway application or in an enclosure application with tempered glass inserts (available on PE, TL and LUX only).

For Further Information, please call: 1-800-931-5655

Toe Guard

- Available on all the models where you will install residential doors, the toe guard will eliminate the shear points. This is therefore an additional safety device that will avoid you to hurt yourself with the door frame while going up.

Automatic Safety Flap on Platform

- A safety flap on platform provides an inclined ramp at the bottom as well as protection during the travel. That is why, at Savaria Concord Lifts, we designed an automatic safety flap. The flap will open automatically when you reach the bottom landing and it will also keep you secure on the platform.

Remote Machine Room

- For quieter operation and ease of service, you can have the machine room installed up to 20' (6 m) linear from the tower itself. We provide the necessary hydraulic hose and wiring.

Fascia Panel (available on Std only)

- This aluminium panel is available on units that will not be installed in a hoistway. It will eliminate the shear points and it is designed to make it safer for the user when they ride the platform. You can order it in the same color of your platform lift.

Aluminium/Steel Filler and Wing Panel

- Whenever there is a gap between the door frame and the wall, we offer you to fill it with an aluminium/steel filler and wing panel that will fit with the whole finish.

For Further Information, please call: 1-800-931-5655

Full Height Enclosure Extension Kit (N/A on Std)

- With an enclosure system, it is possible to have your platform lift totally enclosed. It is an additional safety feature since the height of your enclosure will go from 42" to more than 80". It is also an ideal solution for outdoor applications because your elevator will be full height enclosed.

(**Warning** : you have to order a top landing door with it).

Plexiglas Dome (N/A on STD)

- If you choose a full height extension kit, we recommend, especially on an outdoor application, to order a **Plexiglas dome** on the top of the enclosure. Hence you will be apt to use your elevator in all weather conditions.

View from inside

Ventilation System (N/A on STD)

- Available on enclosure models (PE, TL), this option is advised when you order a Plexiglas dome because the enclosure will be then totally closed, so the inside air will slowly renew. We recommend it on sun exposed units and it will ensure you to have a cooler temperature while using the lift.

- The ventilation system is thermostat-regulated and it has a battery back-up system that kicks in for an hour in case of a power failure.

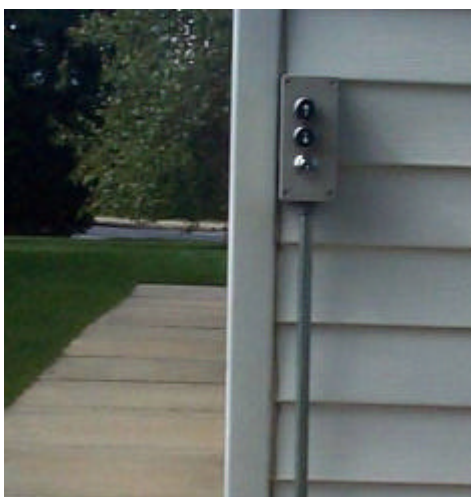

Side view

For Further Information, please call: 1-800-931-5655

The V-1504 STD

Without enclosure, the Standard model can be installed in a hoistway. Thus, the elevator will be integrated into your home environment. Also applicable in commercial buildings, its versatility provides the best architectural choice for a school, a church or office buildings.

Call/Send Station With Key

- Definitely recommended on a hoistway application, this call/send station will give you real freedom of movement. It can be surface mounted (right) or flush mounted (left).

For Further Information, please call: 1-800-931-5655

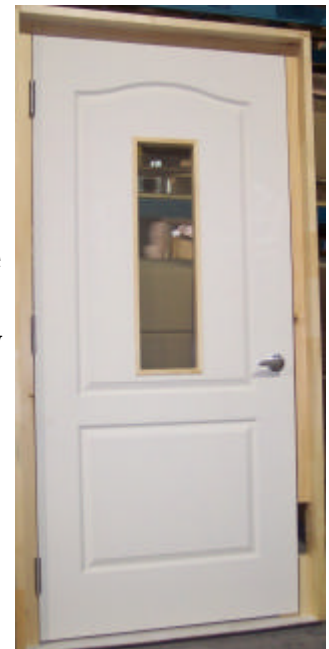

42" Platform Gate

- This gate will be set on the platform and has a metal insert. We provide it with an electric strike. (See note)

Flush Mounted Wooden Door and Frame with G.A.L Interlock

- For hoistway applications, we propose wooden doors that are prepared to receive a G.A.L interlock. We recommend these doors because of their finish, they would make your hoistway nicer and being flush mounted inside the hoistway makes it safer.

Stainless Steel Cladding For Side Guard Panels & Tower of 96" (2,438 mm)

- Ideal for a **high end application**, this cladding in Stainless Steel gives your platform lift a luxury finish. It will perfectly fit in a high end building, being then a good alternative to a LUX model.

Note : all gates and doors must have identical locks.

For Further Information, please call: 1-800-931-5655

The V-1504 TL

The **V-1504 TL** has an enclosure with metal inserts from the bottom landing door to the top landing gate. It is a good alternative to a three gate system because of its simplicity and ease of operation.

1/4" (6 mm) Tempered Glass Inserts Or 1/4" (6 mm) Tempered & Laminated Glass Inserts

- These inserts are made to make your V-1504 TL or PE more attractive. Moreover, those inserts of glass are scratch resistant. Thus, your elevator will stay new along the years.

The V-1504 PE

With an aluminium enclosure with 1/4" clear Plexiglas inserts, the **V-1504 PE** is an affordable accessibility solution for a **public building**. This enclosure makes your V-1504 look like a modern elevator and that is one of the reasons why it is chosen by many museums, office buildings... Its modern design has already appealed many architects, so do not hesitate to have it installed.

Outdoor package with
Ventilation System
and Dome

Bronze Plexiglas Enclosure

- Ideal for an outdoor application, the bronze Plexiglas inserts comply perfectly with modern constructions and your moves will be more discrete.

Outdoor Package, Ventilation System
And Plexiglas Dome
White electrostatic powder coat paint and
bronze Plexiglas inserts.

The V-1504 LUX

The luxury model has been designed to meet those very personalized architectural needs. It is a rich blend of tempered glass, stainless steel or brass materials. In order to have the best finish ever, we deliver the enclosure with a bottom landing door and a top landing gate or door, depending on your needs.

The V-1504 Prestige (picture)

Optional on the V-1504 Lux, the **Prestige** is the first class commercial elevator. Its particularity is to be a frameless model, and the whole structure is made in 1/2" tempered glass. With its classy finish and its contemporary style, the **Prestige** will become an essential element of your décor.

For Further Information, please call: 1-800-931-5655

V-1504

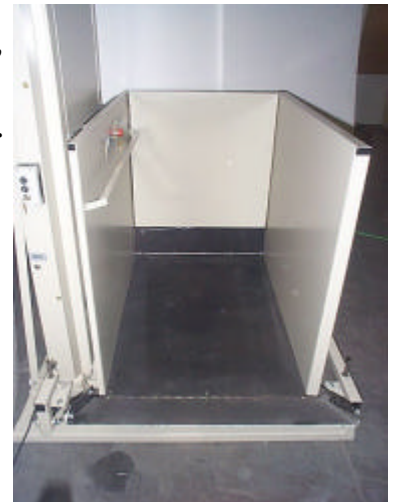

The V-1504 Mobile

The mobile model is a lift that can be rolled inside a building to any low rise barrier (the total travel of the lift is 48" (1,219 mm)) in order to become wheelchair accessible. It easily stores out of sight when not in use.

Bottom Landing Side Platform Gate

- Instead of having only an access ramp on the bottom landing side, you can add a platform gate, it will make you feel safer during the travel. The platform gate will be installed on the platform so it will reduce by a little the size of the platform.

Foldable tower for low overhead

- This option makes the V-1504 Mobile easy to store in any location. You will also be able to have a larger use of your elevator. All low barriers with low overhead will be will be now accessible thanks to this option.

Note: For storage and moving around, the door opening must be 96" high (2,438 mm) minimum.

For Further Information, please call: 1-800-931-5655

Telecab Residential Elevator

Residential Access

The **Telecab** is a two-stop residential elevator which does not need a hoist way. The benefit is that your living space is maximized and that the construction is minimized.

Traditional Telecab

- The **traditional Telecab** is made of a metal cab and a steel door with clear or bronze Plexiglas inserts with vacuum plastic corner and control operating panel.

Premium Telecab (pictures)

- The **Premium Telecab** has a metal structure partly covered with vacuum formed ABS plastic components and clear or bronze Plexiglas inserts. The Premium looks modern thanks to this new finish, it will therefore adapt easily in your environment.

Battery Operation

- This option allows you to use the Telecab in normal use in case of power failure. Thus, you will have freedom of movement in any case.

Custom color

- If you want a **custom color** for your unit, you can choose the color that will best fit your environment on our color chart (see page 4)

Additional Stop (for hoistway application only)

- You can have a third stop on your Telecab in order to make it very useful and you will have the possibility to access every storey of your house. This option includes a specific controller, call stations, limit switches and one (1) non fire rated electric strike. (one (1) extra electric strike needs to be purchased).

Accordion Car Gate

- Mandatory in hoistway applications, the accordion car gate make things easier for you by avoiding to manipulate two swing doors at each landing.

Two door concept

- You can have a second door on your platform. There will be a door at the front and an other one at the back. This option makes the Telecab more versatile and the Telecab will be then able to give you the service you really need.

90° Access (Includes 2nd door)

- To adapt to most architectural challenges, we also offer a 90° Access on car. This means that your Telecab will have two doors at right angle.

Tower against long side of cab (custom platform only)

- This option is offered in order to make the Telecab more suitable so that it can answer most architectural requirements. Hence, all the benefits of using a Telecab can be offered to everybody. On a standard Telecab, the tower is against is against the short side of cab while this option consists in putting the tower against the long side of cab. This is an ideal option for narrow spaces.

Ultimo Residential Elevator

Residential Access

Savaria Concord Lifts is proud to introduce you to its new **Ultimo**. Easily and quickly installed, it will however fit to your home and even embellish it thanks to its large choice of finishes. The Ultimo is an elevator that will fit in nearly every kind of home, from the smallest to the biggest, since you can have up to 6 landings.

Optional Hall Stations

When ordering your Ultimo, you will have to choose between different call stations. We propose models with the **level indicator** to show you which landing your elevator is at.

You can also have a **hall station with key** that will disable it, however you will be able to operate the lift and use other hall stations.

Hall Station with digital floor position

Standard Hall Station

Small Hall Station

Hall Station With Key and digital floor position

For Further Information, please call: 1-800-931-5655

Savaria Fire-Rated Door

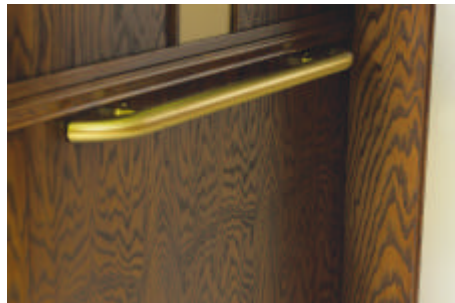

- This door is a landing swing door. As we insist on security at Savaria Concord Lifts, this model is **fire resistant for 90 minutes**. It fits most wall construction (wood, concrete, block) and is a welded frame.

Handrail (in Brass)

- Coming standard in Stainless Steel, it is also available in brass.

Handrail in Stainless Steel

Handrail in Brass

Car Operating Panel

- Offered in Stainless Steel (Standard) or in Brass (optional), the Car Operating Panel is an essential piece of your elevator.

Digital Floor Position Indicator in Cab

- Why not having the same features of a commercial lift at home? Savaria Concord Lifts offers you to have a **red numerical indicator** recessed in the car operating panel. We recommend it when you have three or more landings because it will tell you where your elevator is during the travel.

For Further Information, please call: 1-800-931-5655

Accordion Cab Gate

- Vinyl Panel Accordion Gates (White or Tan) come standard on our Ultimo. We also offer you the possibility to have more light and more visibility in your cab thanks to clear vision panel accordion gate. You can choose between the **clear or bronze acrylic vision panel**. Those panels will give more charm to your elevator by making it look purer.

Telephone

- On all our models, the telephone jack will be Standard. However, we also offer you to have cabinets recessed in Cab. The telephone Cabinet is available in Stainless Steel or in Brass. The benefit of having a cabinet is that your phone will be hidden in it but very easy to use.

Cab Lighting

- Several types of Cab lighting are offered. The lights are recessed in the ceiling of all models. The standard lights are **white** and we offer you to have them in **brass** or in **silver**. Thus, you can choose the best features to fit your home environment.

Door Options

G.A.L. System Shown

G.A.L Type “N” Interlock (available on Multilift, V-1504 and Ultimo)

This electromechanical interlock locks the door when the platform is not at the landing. It ensures that you will not open the door unless the elevator has arrived at your landing. This is a prime safety feature.

Emergency Key

E.M.I Interlock

Available on Ultimo only, this interlock has the same feature as a typical electric strike.

For all hoistway applications, we offer you the possibility to have electric strike at each landing. The electric strike locks the door when the cab is operating or at another landing. We offer two models:

- **Non fire-rated Electric Strike (Savaria 2083 EJ)**
- **Fire-rated Electric Strike (Von Duprin) (available on Multilift, V-1504 and Telecab)**

This electric strike can resist fire for 90 minutes. To be installed on a fire-rated door.

Commander: Automatic Door Operator (Indoor or Outdoor) (available on V-1504 and Telecab)

- Thanks to the **Commander**, you can now enjoy the freedom of movement throughout your home by converting any residential swing door to automatic operation without modifying your existing door frames. This can

also be used on your lift doors indoor or outdoor.

Hydraulic Door Closer

- To improve the use of doors on your lifts, you can use a hydraulic door closer. Your door will close automatically and your lift will be easier to operate, wait for the door to close and go.

Automatic Gate Operator (available on V-1504)

- This will make your platform lift very easy to operate when equipped with a top landing gate. You can open the gate from a remote location thanks to the included controller and once on the platform, you just have to wait for the gate to close and go.
